

Trucks Not Allowed into Thorn Valley Estate

1) Tippers as in the pictures below.

2) Trucks delivering large and heavy machinery i.e. big excavators

3) Trucks delivering bricks using the trucks bellow. Deliveries to be limited to 5000 bricks at a time. No super link trucks are permitted

Brick deliveries making use of trailers may be handled in the following way, the truck detaches the trailer, off loads the bricks with the remaining truck and trailer at the Site and returns to the parked trailer and moves the bricks onto the truck and trailer and brings this second load into the Estate, to off load these final bricks. The Truck and Trailer then leave the Estate, hitch up the other Trailer and leave.

This splitting and re-loading of bricks from one trailer to another must not be undertaken outside of at the entrance to the Estate, where it will cause congestion and inconvenience to all others, as well as possible damage.

4) Furniture removal trucks with trailers, or super links

5) Trucks with trailers carrying anything except for roof trusses Triple Axel trucks are too long and the wheels can drag and damage the roads
